FLORIDA ATLANTIC UNIVERSITY

VIRTUAL RESEARCH IN ACTION

580,000 people aged 65 and older are living with Alzheimer's disease in Florida. By 2025, that number is expected to increase by 24%.

Join Gregg Fields, Ph.D., as he discusses new techniques, in collaboration with the Delray Medical Center, to treat and monitor Alzheimer's.

His talk will cover:

- The use of Magnetic resonance-guided focused ultrasound (MRgFUS) technology to deliver drugs to the brain
- Diagnosis using less invasive and less expensive blood-based biomarkers
- The use of biomarkers to evaluate the potential effectiveness of therapeutic interventions

New Approaches to Combat Alzheimer's Disease

Presented by Gregg Fields, Ph.D.,
executive director of FAU's Institute for
Human Health and Disease Intervention
(I-health) and a professor in the Charles
E. Schmidt College of Science

1 – 2 P.M. EST
THURSDAY, SEPT. 8
