

DIVISION OF RESEARCH  
FLORIDA ATLANTIC UNIVERSITY

## VIRTUAL RESEARCH IN ACTION

Join Adele Stewart, Ph.D., as she talks about her research on sex bias in neuropsychiatric disease and how a person's sex can shape the behavioral trajectory of underlying risk factors for mental illness.

Rather than identifying one sex as resilient, Stewart's research unveils that sex can drive alternative behavioral patterns in males and females.

Stewart will also delve into genetic variations that could shed insight on common neuropsychiatric conditions.

## Debunking Myths: Does Your Sex Shape Your Behavior?

Presented by Adele Stewart, Ph.D., research  
assistant professor, biomedical science,  
FAU's Stiles-Nicholson Brain Institute

1 – 2 P.M. EST  
THURSDAY, MARCH 31
